Summary

Application Systems Analyst with expertise in Power BI, Microsoft Dynamics 365, and Power Apps, driving data-driven decision-making and operational efficiency. I am currently developing a project management reporting tool that integrates Power BI dashboards with Power Apps to increase operational efficiency by providing clear, actionable, data-driven insights. Educational background in Data Analytics and Information Systems from Old Dominion University, providing a strong technical and analytical foundation. Previous experience as an IT Specialist leading ERP/CRM integrations and WordPress development, streamlining operations, and enhancing stakeholder decision-making. Recognized for collaboration, problem-solving, and delivering intuitive, user-friendly solutions that exceed project goals.

Experience

Serco-Norfolk | VA
Application System Analyst | 11/2023 - Present

- I worked with stakeholders to gather data and built a model-driven project management tracking app using Microsoft Power Apps, Power Automate, and Dataverse.
- I built multiple Power BI Dashboards to visualize the model-driven app's captured data, leading to a better understanding of employee usage and efficiency.
- I helped build a new SharePoint Online site for the storage, sharing, and collaboration of project data.
- Provided guidance on Prompt Engineering and Automation.

Bazon-cox & Associates Inc. | Chesapeake, VA
IT Specialist/Web Developer | 06/2022 - 11/2023

- Designed and executed a comprehensive WordPress website project for the organization following agile methodologies.
- Led requirements-gathering efforts and managed the procurement and integration of advanced ERP/ CRM software.
- Utilized Power BI for data visualization and reporting to support informed decision-making.
- Contributed to server rack installations and provided on-site assistance for local helpdesk support.

Junex-Remote
Team Lead | 01/2021 - 03/2023

- Managed a portfolio of 100+ WordPress websites, optimizing operations using ManageWP, Slack, Zendesk, and Asana.
- Analyzed and improved SEO performance through data analysis ensuring continuous enhancement via Google Analytics and Microsoft Excel.
- Handled customer requests for website modifications, from planning to execution and testing.

EHRTS-Remote
Associate Developer, IT Specialist | 08/2018 - 07/2020

- Created and maintained WordPress websites while providing IT support.
- Utilized SharePoint, Microsoft Teams, and Power Apps for administrative functions within Office 365.
- Followed the software development lifecycle in building AHLTA AIM Forms in conjunction with requirements gathering.
- Contributed to the training and support of the AHLTA AIM Forms at numerous locations.
